Week 1-2 Classwork Due: 08/10/2023		
Quarter Exams wght 14.00%		
Student Media Quart... Due: 10/05/2023		

MATH EQUATION

(grade as decimal x weight of category) + (grade as decimal x weight of category) + ... + (grade as decimal x weight of category) + (Q1 exam grade as decimal x 7) + (grade you think you will get on Q2 x 7)

EXAMPLE

$$(.9738 \times 25) + (.5292 \times 20) + \dots + (\dots) + (.75 \times 7) + (.30 \times 7)$$

KEY NOTES:

- does not matter # of categories
- write each percentage as a decimal
- write 100% as 1.00
- write 6% as .06
- if you're trying to find the grade of math use 7.5 instead of 7
